

# TROY M607 / M608 / M609

## MICR Printer

Select your preferred level of security by choosing from three models including our basic MICR printer, our more advanced MICR Secure printer, or our most advanced MICR Secure Ex printer. This model is fully compatible with TROY MICR cartridges and standard HP cartridges. Fast printing and features like duplexing allow for multifunctional use in small to medium sized office environments. Enjoy HP award-winning reliability combined with optimized security from TROY.

### Benefits

#### Streamline Your Secure Check Printing

TROY M607 / 608 / 609 MICR Printers eliminate the security risks of using preprinted check stock by allowing companies to print checks on demand. Incorporate your logo, customer data, signature, and MICR line onto the checks at the point of print. With three models, each available with three security levels, you can choose the print capacity and protection to fit your organization's needs.

#### Add Layers of Security

The security features of the TROY M607, M608, M609 MICR Printers, combined with TROY MICR Toner Secure, ensure each printed check is highly resistant to fraudulent alteration.

#### Reduce Time Consuming Processes

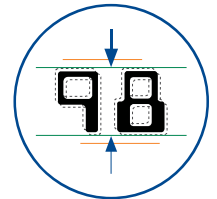

Simplify or eliminate chain of custody procedures with built-in tray locks and steel shielding to protect valuable check stock in the printer.

### Features

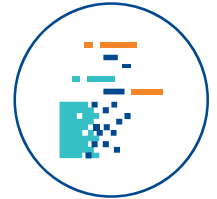

#### ExPT™ Exact Positioning Technology

A MICR line out of alignment is one cause of rejected checks, a multi-million dollar problem for banks and companies. ExPT allows users to precisely adjust the MICR line without affecting the data file.

#### Built-In Secure Encryption and Decryption

Data security is critical in a distributed printing application. TROY's encryption/decryption technology "unlocks" and prints the data only when it is received at the TROY printer.

#### Exclusive TROYMark™ Intelligent, Anti-Tampering Technology

TROYMark is a watermark of user-defined, variable data, printed diagonally across each check. It provides state-of-the-art deterrence of fraudulent check alteration.

#### 3-Position Printer Lock

Most businesses locate their workgroup printer in an open office environment, creating a security risk. This 3-position lock allows users to physically lock the printer's secure resources, protecting users from fraud by refusing unauthorized access.

#### Paper Tray Locks & Tray Shielding

Prevent unauthorized access to valuable check stock with built-in locking paper trays and steel tray shielding to prevent paper removal from the back of the printer.
